

Fire sleeve Red Oxide silicone coated glass fibre sleeving

SRF Fire sleeve is manufactured from 'E' glass fibre yarn knitted to form a sleeve and coated with high-grade silicone elastomer rubber.

What's it used for?

SFR Fire Sleeve is a very flexible sleeving designed to protect wires, cables, and hoses from high ambient temperatures.

It will offer continuous protection at an operating temperature of 260°C and can withstand a molten metal splash at 1200°C.

It is highly resistant to most oils, hydraulic fluids, fuels, acids and alkalis. The high grade rubber forms a protective SiO₂ layer when exposed to flame.

It provides personnel with protection against burns from hot boxes, steam lines etc. and helps to reduce energy loss by retaining heat within the pipework.

Standard format

Inside diameter: 4mm to 203mm
Method of supply: 15mtr coils

Other colours available by special order

Quick Facts

Standard colour:	Red Oxide
Continuous operating temp:	260°C (500°F)
Molten splash resistance:	Outstanding
Flame resistance:	Very good
Abrasion resistance:	Very good
Flexibility:	Outstanding
Water and oil resistance:	Outstanding
Wall Thickness:	4mm +/-0.5mm
Average Dielectric Strength:	30Kv +

- ✓ Complies with EN 45545-2
- ✓ Tested to ISO 11925-2
- ✓ Meets requirement for IEC 60695-11-10
Classified as HB and V0
- ✓ Meets requirements for UL94 rating V0, V1, V2
